-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this **invention**," "The disclosure describes," etc.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, and 7 – 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasui et al. (US 6,483,429 B1).

Regarding claims 1, 5, 7, and 11 - 14, Yasui et al. teaches a parking assist apparatus and system comprising a display device (30) that displays an actual image of surroundings of a vehicle (1; figs. 1, 5A – 5D; col. 6, lines 27 – 30) and a target parking frame indicating a target parking position where the vehicle is to be parked (as illustrated in figs. 10A – 10C; the target parking frame indicated by item 27); an initial display control device (20) that initially displays the target parking frame on the display device by using a past (stored) setting of the target parking position performed by a user

Art Unit: 3661

(col. 8, lines 16 – 23; col. 9, lines 4 – 7 at least); and a guide device (24) that automatically guides the vehicle to the target parking position set by the user moving the target parking frame initially displayed (col. 10, line 56 – col. 11, line 21 at least); a detection device that detects a stopped state of a vehicle and a recognition device that recognizes a candidate relationship with the detected stopped state (col. 1, lines 14 – 25 at least).

Regarding claims 8 – 10, Yasui further teaches the display recognizing target position and actual image around the vehicle and manual operation to adjust the position (col. 4, lines 28 – 38), a position of a steering angle (when sensed by item 40).

***Allowable Subject Matter***

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4 and 6 are allowed.

The prior art of record fail to teach a parking assist apparatus/method for a vehicle comprising, among other limitations, ***constantly computing and storing a change in orientation of the vehicle for every predetermined travel distance during driving of the vehicle.***

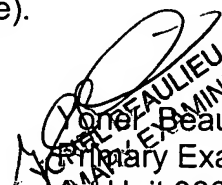

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kakinami et al. US 6,476,730 B2) teaches an assistant apparatus and method for a vehicle in reverse motion.
